Forensic Science International, 45 (1990) 285–288
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 45 (1990)

alcohol, elimination, pharmacokinetics, drunk drivers, double sampling, widmark equation, back calculation, 107
alcohol, screening, drugs, driving, 1
alcohol, screening, drugs, driving, 5
alcohol-induced diuresis, concentration-time profiles of alcohol in urine, dose response relationship, 217
amphetamine, methamphetamine, headspace gas chromatography, 181
amplification, DNA, polymerase chain reaction, forensic, evaluation, 201
anaphylaxis, compound 48/80, histamine, experimental model, postmortem change, 159

back calculation, alcohol, elimination, pharmacokinetics, drunk drivers, double sampling, widmark equation, 107
basilar thrombosis, minor head injury, subarachnoid haemorrhage, 239
biology, urine, uric acid, urea nitrogen, urease, uricase, urinary stains, 27
bloodstains, haptoglobin, haptoglobin-specific DNA probe, 39
blood stains, HLA system, dry spleen, individualization of human tissues, forensic serology, 97
blood storage, toxicology, methemoglobin, spectrophotometry, freezing, cryoprotectant, 129
body fluids, sudden infant death syndrome, melatonin, circadian rhythm, 171
bone length, ulna, stature, reconstruction, fragmentary measure, multilinear regression, forensic anthropology, 15

casting technique, document examination, half-silvered mirror, comparison projector, 63
cathinone, khat (*Catha edulis*), norpseudoephedrine, thin layer chromatography, identification, 47
chloride, postmortem interval, rat plasma, 117
circadian rhythm, sudden infant death syndrome, melatonin, body fluids, 171
comparison projector, document examination, half-silvered mirror, casting technique, 63
compound 48/80, anaphylaxis, histamine, experimental model, postmortem change, 159
concentration-time profiles of alcohol in urine, alcohol-induced diuresis, dose response relationship, 217
correction fluid, questioned documents, inks, luminescence, infrared, luminescence-masking components, handwriting, 265
cryoprotectant, toxicology, methemoglobin, spectrophotometry, blood storage, freezing, 129

deslanoside, digitalis glycosides, high performance liquid chromatography, 231
digitalis glycosides, deslanoside, high performance liquid chromatography, 231
DNA, amplification, polymerase chain reaction, forensic, evaluation, 201
document examination, half-silvered mirror, casting technique, comparison projector, 63
dose response relationship, alcohol-induced diuresis, concentration-time profiles of alcohol in urine, 217
dot immunoblotting, GM allotyping, monoclonal antibody, 197
double sampling, alcohol, elimination, pharmacokinetics, drunk drivers, widmark equation, back calculation, 107
driving, screening, drugs, alcohol, 1
driving, screening, drugs, alcohol, 5
drugs, screening, alcohol, driving, 1
drugs, screening, alcohol, driving, 5
drug influence, traffic accidents, 273
drunk drivers, alcohol, elimination, pharmacokinetics, double sampling, widmark equation, back calculation, 107
dry spleen, HLA system, blood stains, individualization of human tissues, forensic serology, 97

electronic shuttered camera, typewritter ribbons, single strike, video tape recording, 85
elimination, alcohol, pharmacokinetics, drunk drivers, double sampling, widmark equation, back calculation, 107
estimation of age, image analysis, forensic odontology. 143
evaluation, amplification, DNA, polymerase chain reaction, forensic, 201
experimental model, anaphylaxis, compound 48/80, histamine, postmortem change, 159

fatality, fentanyl intoxication, midazolam, 247
fentanyl intoxication, midazolam, fatality, 247
fingerprinting, 3,4-methylenedioxymethylamphetamine, synthesis, reductive amination, reaction mixtures, impurities, 91
fingerprints, luminescence, gaseous electrical discharge, plasma, UV, 73
forensic, amplification, DNA, polymerase chain reaction, evaluation, 201
forensic anthropology, ulna, stature, bone length, reconstruction, fragmentary measure, multilinear regression, 15
forensic odontology. estimation of age, image analysis, 143
forensic serology, HLA system, dry spleen, blood stains, individualization of human tissues, 97
fracture of the transverse process of the atlas, traumatic basal subarachniod hemorrhage, occipito-atlanto-axial dislocations, malformations of the atlas, vertebral artery rupture, mechanism, 53
fragmentary measure, ulna, stature, bone length, reconstruction, multilinear regression, forensic anthropology, 15
freezing, toxicology, methemoglobin, spectrophotometry, blood storage, cryoprotectant, 129

gaseous electrical discharge, fingerprints, luminescence, plasma, UV, 73
gene frequency, human urine, transferrin, isoelectric focusing, immunoblotting, 225
GM allotyping, dot immunoblotting, monoclonal antibody, 197

half-silvered mirror, document examination, casting technique, comparison projector, 63
handwriting, questioned documents, inks, luminescence, infrared, luminescence-masking components, correction fluid, 265
haptoglobin, bloodstains, haptoglobin-specific DNA probe, 39
haptoglobin-specific DNA probe, haptoglobin, bloodstains, 39
headspace gas chromatography, methamphetamine, amphetamine, 181
high performance liquid chromatography, deslanoside, digitalis glycosides, 231
histamine, anaphylaxis, compound 48/80, experimental model, postmortem change, 159
histochemical methods, sudden death, myocardial ischemia, 151
HLA system, dry spleen, blood stains, individualization of human tissues, forensic serology, 97
human urine, transferrin, isoelectric focusing, immunoblotting, gene frequency, 225

identification, khat (*Catha edulis*), cathinone, norpseudoephedrine, thin layer chromatography, 47
image analysis, estimation of age, forensic odontology. 143
immunoblotting, human urine, transferrin, isoelectric focusing, gene frequency, 225
immunoperoxidase staining, myocardium, ischaemic/hypoxic damage, 135
impurities, 3,4-methylenedioxymethylamphetamine, synthesis, reductive amination, reaction mixtures, fingerprinting, 91
individualization of human tissues, HLA system, dry spleen, blood stains, forensic serology, 97
infrared, questioned documents, inks, luminescence, luminescence-masking components, correction fluid, handwriting, 265
inks, questioned documents, luminescence, infrared, luminescence-masking components, correction fluid, handwriting, 265
ischaemic/hypoxic damage, myocardium, immunoperoxidase staining, 135
isoelectric focusing, human urine, transferrin, immunoblotting, gene frequency, 225

khat (*Catha edulis*), cathinone, norpseudoephedrine, thin layer chromatography, identification, 47
luminescence, fingerprints, gaseous electrical discharge, plasma, UV, 73
luminescence, questioned documents, inks, infrared, luminescence-masking components, correction fluid, handwriting, 265
luminescence-masking components, questioned documents, inks, luminescence,

infrared, correction fluid, handwriting, 265

malformations of the atlas, traumatic basal subarachniod hemorrhage, fracture of the transverse process of the atlas, occipito-atlanto-axial dislocations, vertebral artery rupture, mechanism, 53
mechanism, traumatic basal subarachniod hemorrhage, fracture of the transverse process of the atlas, occipito-atlanto-axial dislocations, malformations of the atlas, vertebral artery rupture, 53
melatonin, sudden infant death syndrome, body fluids, circadian rhythm, 171
methamphetamine, amphetamine, headspace gas chromatography, 181
methemoglobin, toxicology, spectrophotometry, blood storage, freezing, cryoprotectant, 129
3,4-methylenedioxymethylamphetamine, synthesis, reductive amination, reaction mixtures, impurities, fingerprinting, 91
midazolam, fentanyl intoxication, fatality, 247
minor head injury, subarachnoid haemorrhage, basilar thrombosis, 239
monoclonal antibody, GM allotyping, dot immunoblotting, 197
multilinear regression, ulna, stature, bone length, reconstruction, fragmentary measure, forensic anthropology, 15
myocardial ischemia, sudden death, histochemical methods, 151
myocardium, ischaemic/hypoxic damage, immunoperoxidase staining, 135

norpseudeophedrine, khat (Catha edulis), cathinone, thin layer chromatography, identification, 47

occipito-atlanto-axial dislocations, traumatic basal subarachniod hemorrhage, fracture of the transverse process of the atlas, malformations of the atlas, vertebral artery rupture, mechanism, 53

pharmacokinetics, alcohol, elimination, drunk drivers, double sampling, widmark equation, back calculation, 107
plasma, fingerprints, luminescence, gaseous electrical discharge, UV, 73
polymerase chain reaction, amplification, DNA, forensic, evaluation, 201
post-mortem, toxicology, 253
postmortem change, anaphylaxis, compound 48/80, histamine, experimental model, 159
postmortem interval, chloride, rat plasma, 117

questioned documents, inks, luminescence, infrared, luminescence-masking components, correction fluid, handwriting, 265

rat plasma, postmortem interval, chloride, 117
reaction mixtures, 3,4-methylenedioxymethyl-amphetamine, synthesis, reductive amination, impurities, fingerprinting, 91
reconstruction, ulna, stature, bone length, fragmentary measure, multilinear regression, forensic anthropology, 15
reductive amination, 3,4-methylenedioxymethyl-amphetamine, synthesis, reaction mixtures, impurities, fingerprinting, 91

screening, drugs, alcohol, driving, 1
screening, drugs, alcohol, driving, 5
single strike, typewritter ribbons, video tape recording, electronic shuttered camera, 85
spectrophotometry, toxicology, methemoglobin, blood storage, freezing, cryoprotectant, 129
stature, ulna, bone length, reconstruction, fragmentary measure, multilinear regression, forensic anthropology, 15
subarachnoid haemorrhage, minor head injury, basilar thrombosis, 239
sudden death, histochemical methods, myocardial ischemia, 151
sudden infant death syndrome, melatonin, body fluids, circadian rhythm, 171
synthesis, 3,4-methylenedioxymethylamphetamine, reductive amination, reaction mixtures, impurities, fingerprinting, 91

thin layer chromatography, khat (*Catha edulis*), cathinone, norpseudoephedrine, identification, 47
toxicology, methemoglobin, spectrophotometry, blood storage, freezing, cryoprotectant, 129
toxicology, post-mortem, 253
traffic accidents, drug influence, 273
transferrin, human urine, isoelectric focusing, immunoblotting, gene frequency, 225
traumatic basal subarachniod hemorrhage, fracture of the transverse process of the

atlas, occipito-atlanto-axial dislocations, malformations of the atlas, vertebral artery rupture, mechanism, 53
typewritter ribbons, single strike, video tape recording, electronic shuttered camera, 85

ulna, stature, bone length, reconstruction, fragmentary measure, multilinear regression, forensic anthropology, 15
urease, biology, urine, uric acid, urea nitrogen, uricase, urinary stains, 27
urea nitrogen, biology, urine, uric acid, urease, uricase, urinary stains, 27
uricase, biology, urine, uric acid, urea nitrogen, urease, urinary stains, 27
uric acid, biology, urine, urea nitrogen, urease, uricase, urinary stains, 27
urinary stains, biology, urine, uric acid, urea nitrogen, urease, uricase, 27
urine, biology, uric acid, urea nitrogen, urease, uricase, urinary stains, 27
UV, fingerprints, luminescence, gaseous electrical discharge, plasma, 73

vertebral artery rupture, traumatic basal subarachniod hemorrhage, fracture of the transverse process of the atlas, occipito-atlanto-axial dislocations, malformations of the atlas, mechanism, 53
video tape recording, typewritter ribbons, single strike, electronic shuttered camera, 85

widmark equation, alcohol, elimination, pharmacokinetics, drunk drivers, double sampling, back calculation, 107
